

Lab 4: Debugging

Watch the instructions video included with this assignment [<insert video link here>](#), and follow along these instructions to complete this assignment.

1. Update your branch code from master (see the previous video on how to do so)
2. Go into Eclipse and see if your code compiles
3. Fix any errors that you see
4. Try building using maven (in Terminal / Cmd Prompt)
5. Upload JAR file in Lambda Function
6. Go to Developer Portal —> Test, and enter: “tell me a fact”
7. See how Alexa responds
8. If her response is not as expected, go to Lambda function —> "Monitoring" tab, then click "View logs in CloudWatch"
9. Make any Java code changes in Eclipse
10. Repeat steps 4-9 until you are satisfied with the way the skill works
11. Commit your code changes to your branch in Github Desktop

Note: There are 4 bugs in the current version of the space geek skill. 1 syntax / compiler, 2 runtime, and 1 logic bug.
